Name of the Test Scenario	Description of the Test	Notes
Registration	**Last step in registering a new account Can't be automated because of the reCAPTCHS security barrier**	**—**
Logging in	**After a certain number of tries a reCAPTCHA becomes required to login**	**Managed to Automate it after clearing Google chrome's cache memory stil getting locked by the reCAPCHA after many tries**
Usability testing	**This test scenario would involve testing the website's ease of use, navigation, and overall user experience by having real users perform specific tasks on the website and providing feedback.**	**—**
UI/UX Testing	**This test scenario would involve evaluating the website's visual design, layout, and aesthetics by having a panel of users provide subjective feedback on the website's overall appearance.**	**Some AI are under development to solve this case**
Localization testing	**This test scenario would involve evaluating the website's localization, including verifying that the website is properly translated, that the content is culturally appropriate and that the time and date formats are correct for different regions.**	**—**
Exploratory testing	**This test scenario would involve testing the website's functionality in an unstructured way by freely exploring the website and identifying any issues that may not have been covered by existing test cases.**	**—**
